1 Deutzia, Pride of Rochester
1 Forsythia (Golden Bell)
1 White Lilac
1 Purple Lilac

SPECIAL PRICE FOR
THIS GROUP OF
WELL KNOWN SHRUBS

$2.25
To Our Friends and Customers

WE ARE proud to present our 1927 Catalog of Trees and Plants “Direct From Growers to You.”

This season we are offering a larger and more complete line of Nursery stock than ever before. All stock must conform to the same high standard as we have maintained heretofore and we invite your consideration of our offerings.

We are located on the “Good Old Eastern Shore,” better known as “The Del-Mar-Va Peninsula, The Land of Plenty,” where we are favored with a long growing season of 184 days per year; free from frost April 6th to October 20th. Our soil here is peculiarly adapted to plant growth and practically all kinds of plants are grown here to a perfection that is seldom obtained in other sections. That is why we are able to furnish plants second to none and superior to many offered at much higher prices.

Our experience in growing all kinds of trees and plants is backed by a life-time, which is worth while considering when placing your orders.

In writing this catalog, we have endeavored to give clear, concise descriptions of varieties as we found them, carefully avoiding exaggeration or painting of extravagant pictures to attract attention. Each order receives personal attention, both in the office and packing house.

We urge the policy of early ordering. We wish to especially emphasize it this year, as the demand will be heavy, and the supply limited in some lines.

We hope to receive your orders again this season, and wish you a Prosperous 1927.

Yours for Better Trees and Plants,
DEL-MAR-VA NURSERIES, INC.
E. L. LYNCH, President,
W. A. COSDEN, Vice-President,

Orders. Write plainly and give explicit directions as to address and mode of shipment; otherwise we will forward to our best judgment. All goods travel at purchaser's risk. We assume no responsibility for the goods after delivery to the forwarding companies.

We use every care to secure prompt delivery, but we are not liable for delays or damage in transit. Our responsibility in this respect ends upon delivery in good order to transportation company, but we will gladly render all the aid we can in case claim becomes necessary.

Claims, to receive consideration, must be made within ten (10) days of receipt of goods.

Guarantee. We are very careful to keep each variety true to name as labeled, and are ready at any time to replace, on proper proof, any that may prove otherwise, free of charge, or refund the amount paid, but it is mutually agreed between the purchaser and ourselves that we shall at no time be liable for an amount larger than the original purchase price. We guarantee strictly first-class stock and in live condition when it leaves our hands, but other than this we can not be held responsible for the growth of the trees and plants which we offer.

Terms. Cash with order, unless otherwise arranged; 5 per cent interest charged on overdue bills. Five plants at the 10 rate; six plants at the 12 rate; 13 plants at the 25 rate; 50 plants at the 100 rate; 500 plants at the 1,000 rate.

All quotations in this Catalog are net for goods packed—no extra charge for the packing or delivering to carriers here, unless otherwise agreed on. Customer pays transportation charges. We advise express shipments, as cost is little more than freight on some and which gets through quicker and safer. Light packages will go by parcel post. On all parcel post shipments we suggest that you advise us to ship them C. O. D. for postage, as in this manner you have to pay the exact postage only. It is impossible for us to lay down any exact rules governing the weight of plants when packed, as they vary much.

Prices are quoted subject to stock being unsold upon receipt of your order, and subject to shortage or failure of crops. By placing orders buyers are considered to agree with these terms.

Certificate of inspection of nursery stock will be sent with each shipment, also planting instructions.

Reference. Dun or Bradstreet's, any Bank or Business House in Milford, Delaware; Selbyville Bank, Selbyville, Delaware.

Location. Milford is one of the thriving towns of historic Delaware, with a population of 3,000, situated in Kent and Sussex Counties, on the navigable Mispillion River, ten miles from the Delaware Bay. Its historic landmarks are interesting and fascinating. It is on the Pennsylvania Railroad. Our Nurseries and Proving Grounds are three and one-half miles south of Milford, and is divided by the world's famous "Du Pont Boulevard" which runs from Wilmington to the extreme southern part of Delaware. Write to us for a descriptive folder of the Milford section of the Del-Mar-Va Peninsula, or to the Milford Chamber of Commerce, Milford, Delaware. These are attractive folders and are given to you without cost.

Mileage from Milford

20 to Dover, Delaware.
66 to Wilmington, Delaware.
94 to Philadelphia, Pennsylvania.
267 to Rehoboth Beach, Delaware.
46 to Salisbury, Maryland.
136 to Cape Charles, Virginia.
78 to Baltimore, Maryland.
187 to New York, N. Y.
171 to Norfolk, Virginia.
284 to Pittsburgh, Pennsylvania.
383 to Boston, Massachusetts.

Order Your Nursery Stock Today

Plant now and you will be enjoying Nature's Bounty while the man who puts his off until tomorrow is still coming to a decision. You know 2 feet apart in rows is the answer of so many of your friends' homes that Nursery Stock pays big dividends in added attractiveness. Make your home a Bower of Beauty from the Catalog—RIGHT NOW!

CONIFEROUS AND BROAD-LEAVED EVERGREENS

Evergreens that are adapted to all kinds of plantings are listed here. You can get immediate results from the planting of Evergreens; they beautify your home grounds, not only through the Summer months, but every month of the year. We ship nothing but the best. Our Evergreens have been transplanted several times, have an abundance of showy roots. All our Evergreens are dug with a ball of earth wrapped in burlap, to insure success in transplanting. We will be pleased to have you consult us at any time relative to such planting of Evergreens that you expect to make. We will advise you as to the kinds most suitable, and will gladly help you with your Landscape Planting problems. Feel free to write us.

**American Arborvitae. Thuja Occidentalis.**

One of the best; very handsome with dark green foliage. Grows rapidly and easily and in almost any soil. Can be sheared and makes a fine ornamental hedge with regular clipped head, will keep at any desired height. Allowed to grow, will make a tall screen when planted closely.

EVERGREENS FOR TRANSPLANTING
Balled and Burlapped
They Are Sure to Grow

BROAD-LEAVED EVERGREENS

**Boxwood Suffruticosa.** Dwarf Boxwood. This is a most attractive variety, having small, dense foliage, growing slowly and remaining dwarf and compact. It is the form used for edging in old Colonial gardens.

- 6 to 8 inches, at $1.00
- 10 to 12 inches, at $1.50

**Euonymus Japonicus.** Lustrous, deep green leaves; upright bushy habit; very desirable for specimen plants. Can be trimmed to any desired shape.

- 6 to 12 inches, at $1.00
- 12 to 18 inches, at $2.00
- 18 to 24 inches, at $2.50

**Ilex Opaca.** American Holly. A slow-growing native tree, having short branches with large shining, thorny leaves and bright red berries in winter. Its leaves and berries are used for Christmas wreaths.

- 6 to 12 inches, at $1.75
- 12 to 18 inches, at $1.25
- 18 to 24 inches, at $2.00
- 2 to 3 feet, at $3.00
- 3 to 4 feet, at $3.50
- 4 to 5 feet, at $4.00

**Kalmia Latifolia.** American Laurel. A beautiful native, broad-leaved evergreen shrub, often attaining the size of a small tree. Its thick waxy leaves are retained the year round, giving a striking effect. The pink and white geometrically shaped buds appear and expand into beautiful white and flesh-colored flower cups.

- 18 to 24 inches, at $2.00
- 2 to 3 feet, at $2.50

**Abelia Grandiflora.** Bush Arbutus. One of our most beautiful, popular and satisfactory broad-leaved evergreens. The graceful, drooping stems and branches are covered with dark, glossy leaves which in winter assume a metallic green. From the middle of May until frost tubular-shaped white flowers, about an inch long, are borne in clusters. For single specimens, for groups, or for a hedge, we cannot too strongly recommend this plant.

- 1½ to 2 feet, at each $1.50

**Azalea Hinodegiri.** A bright scarlet form of the well-known and charming Azalea Anemone. But far surpassing it in brilliancy and general beauty; a profuse bloomer; foliage round in shape and evergreen. This variety has glossy leaves.

- Strong plants, each $2.50

**Rhododendron Maximum.** Rosebay Rhododendron. Beautiful light pink flowers freely produced in May-June. Large, handsome foliage, most effective in masses.

- 2 to 3 feet, each $4.50

**Rhododendrons, Hybrids.** Grafted; red, white, pink. Strong plants.

- No. 1 Plants, each $5.00

**Boxwood Semper Virens.** The variety with small dark green leaves; fresh and glossy. A compact grower, thrives in any soil and does well in shaded places. Can be trimmed to any shape and used extensively for hedges, formal gardens and tub specimens. Our sheared plants are very symmetrical and compact.

- 12 to 15 inches, at $1.50
- 15 to 18 inches, at $2.00
DECIDUOUS TREES

Shade Trees are always an attractive setting for the house. They are necessary, too, to add cool comfort to the hot summer days. As an investment, they always add considerably to the renting or selling value of a place. It is the trees that give it environment and atmosphere and make it home. Trees do not wear out like other things; they constantly increase in value. There's a tree at your house, tied to old memories, that you wouldn't part with; plant others; you will be glad later.

We have listed here only such kinds as possess distinctive, decorative quality, and that are suitable for lawn, park and street planting. In planting, do not crowd roots, but allow them to spread freely.

Japanese Blood Leaf Maple. Acer Palma-tum atropurpureum. Leaves extremely bright blood color. Grows in shrub form and is not for shade. As an ornament for a lawn it is unquestionably without an equal.

1½ to 2 feet—$4.00 each, $35.00 per 10.

Schwedleri Maple. Acer Platanoides Schwedleri. Similar to Norway but with a purplish crimson foliage.

6 to 8 feet—$4.50 each, $42.50 per 10.

BEECHES

American Beech, Fagus Americana. Our noble native forest tree with silvery bark; fine spreading growth and symmetrical, rounded head, specially attractive in the spring with its leaves of tender green. Its silvery bark is ornamental in the winter.

8 to 10 feet—$3.00 each, $27.50 per 10.

BIRCHES

Cut Leaf Weeping Birch. One of the most remarkable and beautiful trees for the lawn. Bark is very attractive in the winter, and the drooping cut leaves in the summer months.

5 to 6 feet—$2.00 each, $27.50 per 10.

White Birch. Betula Alba. A small or medium-sized tree with white bark and small, dark green leaves that turn pale yellow in the fall. Often makes two or more stems from the ground. This birch will thrive in dry soil.

4 to 5 feet—$1.50 each, $10.00 per 10.

MAPLES

Silver Leaf Maple. Acer dasyacrum. A very rapid-growing tree of graceful, spreading habit, with leaves of light green above and silver underneath. Desirable for either lawn or street planting. Will grow on poor and dry soil.

4 to 6 feet—$7.50 each, $6.00 per 10.

6 to 8 feet—$1.00 each, $8.00 per 10.

8 to 10 feet—$1.50 each, $14.00 per 10.

10 to 12 feet—$2.00 each, $18.00 per 10.

Red, or Scarlet Maple. Acer rubrum. Of compact growth with fine round head. The leaves color up gorgeously in the fall. Thrives in low or damp places.

8 to 10 feet—$3.50 each, $30.00 per 10.

Sugar Maple. Acer saccharum. Good for the large lawn, but ideal for street planting. One of our stateliest native trees, growing to large size, full and compact with leaves of cool green in spring and summer and taking on the orange and scarlet tints with fall. Its sap makes maple syrup.

8 to 10 feet—$3.50 each, $30.00 per 10.

Norway Maple. Acer Platanoides. One of the best shade trees for all purposes, whether in the lawn or roadside. A favorite street tree. Grows to large size and is of neat, compact habit with a rounded head.

8 to 10 feet—$4.00 each, $35.00 per 10.
CATALPAS

Catalpa Speciosa. A large, handsome tree with immense, tropical looking leaves and bright clusters of white flowers with purple centers. It is very quick growing and makes a fine tree for the lawn. Does well even in poor soil.

6 to 8 feet—75c each, $6.00 per 10.

Catalpa Bungei. To make these, we bud or graft on stems 5 or 6 feet high, a top of the dwarf variety, which makes many short spreading branches without adding to the height; round compact balls on a straight stem. Very formal in effect, but useful only when rightfully placed, as along straight walks. It is known as the Umbrella Tree.

5 to 6 ft. stems, 2-year heads—$2.25 each, $20.00 per 10.

PERSIMMONS

Diospyros Virginiana. American Persimmon. A native of the Southern States, but will thrive and ripen its fruit as far north as the Great Lakes. The tree reaches a height of about 30 feet. The fruit is not large, one-half to one inch in diameter, and must become fully ripe to become edible; best after two or three hard frosts.

6 to 8 feet—$2.00 each, $17.50 per 10.

ELMS

American Elm. Ulmus Americana. A tall and stately tree with spreading top, combining great strength with peculiar grace. The American Elm is one of our grandest native trees. Reaches great size and attains to great age. An ideal tree for the lawn, casting wide stretches of shade while for roadside planting or for street lining the mature Elms will meet above the traffic and form arches over shaded lanes.

8 to 10 feet—$2.00 each, $16.00 per 10.

6 to 8 feet—$2.00 each, $18.00 per 10.

Judas Tree, or Red Bud. Cercis canadensis. A small tree branching irregularly from the ground, spreading in habit, with smooth heart-shaped leaves and branches covering their whole length in early spring before the leaves are out with small pink flowers. A tree for the lawn.

4 to 5 feet—$1.00 each, $9.00 per 10.

European Larch. An upright, tall-growing tree with a conical head, with the needle like foliage of conifers, but not evergreen. Valuable as a timber tree or for ornamental landscape planting. Suitable in well drained soils.

2 to 3 feet—$1.25 each, $11.50 per 10.

American Linden. Tilia Americana. Basswood. A large tree of regular outline, erect and usually rather formal in shape. The leaves are dark green and light underneath, turning to yellow in the fall. The flowers are cream colored and inconspicuous but very sweet.

6 to 8 feet—$2.50 each, $22.50 per 10.
Sweet Gum. Liquidambur styraciflua. A native tree of rare beauty; erect and symmetrical, with curious cork-like bark and leaves that take on the brilliant autumn colors of orange and scarlet.
5 to 6 feet—$1.25 each, $11.50 per 10.
6 to 8 feet—1.50 each, 14.00 per 10.

Tulip Tree. Liriodendron tulipifera. Tulip Poplar. A large and stately tree, suitable for lawn or avenue planting. Quick growing, too, making a compact, pyramidal head. The leaves are dark green turning to yellow in the fall. It has greenish-yellow flowers shaped like a tulip. A healthy, clean, beautiful tree that does well all through the South.
5 to 6 feet—$1.50 each, $12.50 per 10.

Wisconsin Weeping Willow. Forms a large round-headed tree, one of the most elegant of all weeping trees. They thrive best in moist soils, and are most at home by the water's edge; however will thrive well in a drier soil. They lend their uses to the most artistic effects in landscape plantings.
6 to 8 feet—$1.00 each, $9.00 per 10.

Weeping Willow. Salix Babylonica. Tall, spreading, with long, drooping branches and narrow, dark-green leaves. An imposing tree of much graceful beauty.
6 to 8 feet—$1.00 each, $9.00 per 10.

Pussy Willow. Salix caprea. A small, shrub-tree—or large bush—with numerous upright branches; not weeping. The catkins are very large, the buds swelling to great size early in the spring; silvery grey and often with a pinkish tinge. Highly prized for cutting and for furnishing the garden's first spring beauty to house decorations. Florists buy the branches for re-selling. A pretty landscape or garden effect.
2 to 3 feet—50c each, $4.50 per 10.

Scarlet Oak. A grand tree; grows 60 to 80 feet high, with bright green, deeply cut leaves that color to sparkling red in the fall.
6 to 8 feet—$3.00 each, $27.50 per 10.

Weeping Willow.

Pin Oak. Almost pyramidal in habit, and described as half weeping when old, because its lower branches touch the ground. It grows faster and develops the family characteristics earlier than most oaks. Leaves, deep green, glossy and finely divided. Orange-scarlet in fall.
6 to 8 feet—$3.00 each, $27.50 per 10.

6 to 8 feet—$2.50 each, $22.50 per 10.
ORNAMENTAL SHRUBS

Shrubs are as much a part of the well-balanced garden as the lawn or flower borders. Many of them are as decorative as any ornamental foliage plant, while others are highly useful as cut flowers, and a well-arranged planting presents an attractive appearance throughout the entire year.

CONSULT US—WE MAINTAIN A LANDSCAPE DEPARTMENT TO HELP OUR CUSTOMERS WITH THEIR LANDSCAPE PLANTING PROBLEMS.

Shrubs have many uses; such as a dividing line between the flower and the vegetable garden, or between the lawn and uncultivated land beyond; as a background to a flower border; for hiding an unsightly building, fence or foundation, or they may be planted in a mixed shrubbery border, in which case those of short, dense growth should be planted along the front of the border, graduating to the tall-growing kinds at the back.

Apart from your own enjoyment of beautiful things, there is the practical consideration to be remembered, that no investment adds so much to the rent or sale value of a place, as well-planted grounds. We are growing a selected list of the best flowering shrubs, and no lawn is complete without them.

Butterfly Bush. Buddleia. One of the most desirable summer-flowering shrubs, it dies down to the ground in winter, but each spring throws out four to five-foot stems in numbers, making a bushy plant covered from July until frost with delicate lilac-like flowers of dainty beauty and great fragrance, attracting so many butterflies as to give it the common name.

2-year Plants—50c each, $4.00 per 10.

Crepe Myrtle. Lagerstroemia indica. Nobody in the South needs to be told about the universal Crepe Myrtle; it is seen everywhere and is in Southern gardens what the Lilac is in the North. In time it makes a considerable tree. The flowers are daintily fringed and borne in immense panicles; they appear in May and continue all through the summer. We offer both, crimson and pink. We do not recommend planting this shrub north of Delaware.

2 to 3 feet—50c each, $7.00 per 10.

Cydonia Japonica. Japan Quince. One of the earliest heralds of spring, its great splash of scarlet color flowers marking the final departure of winter. The impatient blooms are out before the leaves appear. Dainty single blooms covering the branches with dazzling red. The leaves are glossy green. It bears fruit, but it is not edible. Valuable for early blooming and bright color.

2 to 3 feet—75c each, $7.00 per 10.

Cornus Amomum. Silky Dogwood. White flowers in June, blue berries later, and dull red bark.

2 to 3 feet—75c each, $7.00 per 10.

Cornus Florida. White Flowering Dogwood. Large white flowers produced in spring before the leaves appear. Foliage grayish green.

2 to 3 feet—75c each, $7.00 per 10.

Cornus Siberica. Dogwood. The branches are bright red, very attractive in the winter.

2 to 3 feet—75c each, $7.00 per 10.

2 feet—$2.50 each, $20.00 per 10.

SHRUB COLLECTION No. 45
Eight Most Popular Shrubs, for $3.75

1 Hydrangea P. G. 1 Weigelia Rosea 1 Butterfly Bush
1 Deutzia, Pride of Rochester 1 Mock Orange Syringa 1 Honeysuckle
1 Forsythia 1 Snowberry

Continuous Bloom from April to September.
Deutzia, Pride of Rochester.

**Deutzia Crenata.** Desirable for general planting; flowers borne in spring, in three to five inch trusses. Always satisfactory.

2 to 3 feet—50c each, $4.00 per 10.

**Deutzia Pride of Rochester.** One of the very best. Strong, upright-growing with double white blooms, the outer petals tinged with pink, flowering in mid-June.

2 to 3 feet—50c each, $4.00 per 10.

**Deutzia Lemoinei.** Flowers pure white, borne in profusion on stout branches which are of upright growth. Habit dwarf and free-flowering.

2 to 3 feet—50c each, $4.00 per 10.

**Deutzia Gracillia.** Dwarf. Slender, branched variety, dwarf habit and very early flowering. Flowers pure white.

No. 1 Plants—60c each, $5.00 per 10.

**Forsythia Fortunei.** Golden Bell. Growth upright; foliage deep green; flowers bright yellow, appearing before leaves.

2 to 3 feet—50c each, $4.00 per 10.

**Forsythia Intermedia.** These splendid old shrubs growing 8 to 10 feet tall, eventually light up the garden with glinting masses of yellow very early in spring before the leaves appear. Their bright golden flowers, often appearing before the snow is gone.

2 to 3 feet—50c each, $4.00 per 10.

**Honeysuckle, Pink Tartarian.** The best of all bush Honeysuckles. Upright, somewhat spreading branches and bright green foliage. The flowers are borne freely in May and June, are of bright pink color, followed by showy red berries which ripen in mid-summer and cling to the bush for several weeks.

2 to 3 feet—50c each, $4.00 per 10.

**Hydrangea Paniculata Grandiflora.** Individual flowers of the largest size, creamy white turning in late summer to pink. The blooms are very lasting, and if cut and taken into the house, they will become dry without losing either size or color, and make handsome house decorations for the winter. Begins blooming mid-July, the flowers remaining and new ones being added till late October. Very hardy.

2 to 3 feet—75c each, $7.00 per 10.

**Hydrangea P. G. Tree Form.** Same variety as above, but trained into tree form in the nursery. A very popular one.

3 to 4 feet—$2.00 each, $17.50 per 10.

**Hydrangea Arborescens Grandiflora.** Hills of Snow. Round heads of snowy-white blooms in great profusion from early June to late September. Succeeds anywhere, but does best in a moist, shady location. Especially valuable for its early blooming season. Very hardy.

2 to 3 feet—75c each, $7.00 per 10.

**Hydrangea Otaksa Hortensia.** Wise for planting near the dwelling. Flowers generally blue, with a few exceptions they are delicate pink, depending on the type of soil in which they are planted, but is called a blue by most nurserymen. (Soft wood variety.)

2-year No. 1—$1.00 each, $8.00 per 10.

**Hydrangea Baby Bimbinet.** Without any question this is the best of the highly decorative French varieties. Dwarf, free flowering and early. Large compact trusses of silvery rose flowers which are very attractive. (Soft wood variety.)

2-year No. 1—$1.00 each, $8.00 per 10.

**Hydrangea Mme. E. Mouillere.** The most popular white; very free flowering and of large size and fine form. (Soft wood variety.)

2-year No. 1—$1.00 each, $8.00 per 10.
No. 1 Bushy Plants—80c ea., $7 per 10.

Lilac, Charles X. An old and well known favorite. Deep purple.
No. 1 Bushy Plants—80c ea., $7 per 10.

Peach, Double Flowering. Very desirable. Early spring before leaves appear, the branches are literally covered with large double flowers. Colors red and white.
2 to 3 feet—50c each, $4.00 per 10.

Philadelphus Coronarius. Sweet Mock-orange. Flowers white, in dense clusters so numerous as to bear the branches down when flowering. Resemble orange blossoms.
2 to 3 feet—50c each, $4.00 per 10.

Snowberry. Symphoricarpos. Small, rose-colored flowers in June and July, followed by large clustered, milk-white fruits, which remain far into the winter.
2 to 3 feet—80c each, $7.00 per 10.

Sweet Scented Shrub. Calycanthus. Foliage is of rich green and flowers are of a rare chocolate color, having a delightful odor. An old desirable shrub.
2 to 3 feet—$1.00 each, $8.00 per 10.

No. 1—50c each, $4.00 per 10.

Spirea Billardi. Blooms nearly all summer; rose-colored; fine, showy. July to September.
2 to 3 feet—50c each, $4.00 per 10.

Spirea Billardi Alba. Same as Spirea Billardi, except the flowers are white instead of pink.
2 to 3 feet—50c each, $4.00 per 10.

Spirea Thunbergi. A Japanese species of small size with numerous slender branches somewhat drooping, forming a dense, feathery bush. Narrow linear leaves, bright green fading to orange and scarlet in autumn. Small white flowers in early May.
2 to 3 feet—60c each, $5.00 per 10.

Spirea Van Houtte. The finest of all Spireas, a most charming and beautiful shrub; resembles a fountain with white flowers in May and June. Extraordinarily profuse in bloom; plant is a vigorous attractive hedge, when used in this manner. Fine for mass plantings.
2 to 3 feet—50c each, $4.00 per 10.

Spirea Opulifolia. White flowers borne in flat clusters; old flower heads turn red and make a striking variety of colors. It is very popular.
2 to 3 feet—50c each, $4.00 per 10.

Snowball. Japan. A new variety from Japan. It surpasses the old varieties in several respects.
2 to 3 feet—$1.00 each, $8.00 per 10.

2 to 3 feet—50c each, $6.00 per 10.

Weigela Eva Rathke. The best of the red varieties; with flowers a bright, clear crimson, borne in great profusion; growth more sprawling than the others; not so strong nor so tall. Wonderful as to color.
2 to 3 feet—$1.00 each, $8.00 per 10.

Weigela Rosae. The best known and most popular. A tall-growing vigorous variety with deep pink blossoms borne in wonderful profusion. It never fails to please and makes a great show in June when covered with its pink beauty.
2 to 3 feet—60c each, $5.00 per 10.

Weigela Variegata. In this variety there is the added attraction of leaves handsomely bordered with yellowish-white, making the plant conspicuous all summer long. The flowers are numerous and a bright clear pink as of the variety Rosae.
2 to 3 feet—60c each, $5.00 per 10.

SAVE 5 Per Cent on Your Order by placing it before March 15th and remitting cash with your order.
**VINES AND HEDGING**

**Clematis Paniculata.** This is one of the most attractive and effective of the hardy flowering climbing vines. Especially adaptable for covering trellises, fences, walls and pillars.

- 2-year Vines—60c each, $5.00 per 10.

**Clematis Jackmani.** Covered from July to October with a dense foliage of purple flowers. A strong grower and popular variety.

- 2-year Vines—80c each, $7.50 per 10.

**Clematis Madame Edward Andre.** Flowers bright, velvety red. Large and continuous bloomer.

- 2-year Vines—80c each, $7.50 per 10.

**Dutchman’s Pipe, Aristolochia.** A native species of climbing habit and rapid growth, with magnificent light green heart shaped leaves, 10 to 12 inches in diameter and curious pipe-shaped yellowish-brown flowers.

- 2-year Vines—75c each, $7.00 per 10.

**Hall’s Japan Honeysuckle.** Vigorous, almost evergreen climber with white flowers changing to yellow.

- 2-year Vines—50c each, $4.00 per 10.

**Boston Ivy, Ampelopsis Veitchii, or Japan Ivy.** One of the best climbers for covering walls, but drops its leaves in winter. English is a better variety as it stays green the entire season.

- 2-year Plants—80c each, $7.50 per 10.

**English Ivy.** Used extensively for covering brick or stone walls. A decided evergreen and does not shed its leaves in winter. The best Ivy plant.

- 2-year Plants—80c each, $7.50 per 10.

**Matrimony Vine.** A vigorous climber, branching freely and covered with bright purple, star-shaped flowers, succeeded by brilliant scarlet berries. Fine for porches.

- 2-year Plants—50c each, $4.00 per 10.

**Wisteria Purple.** A beautiful climber of very rapid growth, producing long pendulous clusters of pale, blue flowers in June, also in Fall; is perfectly hardy and one of the most superb climbing vines ever introduced.

- 2-year Plants—60c each, $5.00 per 10.

**Wisteria White.** An attractive and strong grower with a large number of hanging pea-shaped flowers.

- 2-year Plants—60c each, $5.00 per 10.

**CALIFORNIA PRIVET**

This is the leading hedge plant without question; its foliage produced abundantly of the richest dark green, almost makes it an evergreen. Does not shed its foliage until late winter. They should be planted three inches deeper than where they stood in the nursery row and set 6 inches apart. After plants are set cut them down to about 4 inches above the top of the ground and you will be surprised at the growth they will make the following season. All our stock is heavily rooted and well branched.

**BARBERRY THUNBERGII**

For a nice hedge that does not require much trimming, Japanese Barberry Thunbergii stands at the head of the list. It may be pruned just as the owner prefers to have it, being high or low. Planting instructions are the same as California Privet with the exception it should be planted 9 inches apart in the row. Fine for turning out dogs, cats, and other animals.

ROSES

Every home should have Roses. No other flower combines such exquisite form, refinement of texture and delicate fragrance. The range in color is wide enough to please all tastes. A bed of Roses, blooming throughout the summer, is a constant source of pleasure. And it is something easy to have, for Roses take up little room and only require good soil, well fertilized, and some pruning.

If you haven’t a Rose Bed, let us send you a dozen plants; tell us what colors you like, and we will select varieties that please you and do best where you live.

HYBRID TEAS

Monthly Blooming Roses

Large, hardy two-year-old field grown that commence blooming same year planted.

Price—30c each, $3.40 per dozen.

Killarney.

Betty. Coppery pink buds of exquisite form, opening to large, rather shapeless, pale buff-pink flowers with little fragrance. Strong branching growth with large glossy foliage; an excellent bloomer and reliably hardy.

Duchess of Wellington. Enormous, tapering buds of golden orange, slowly opening to very large saffron-colored, sweetly fragrant roses of great size and substance. Plant very vigorous, healthy, and liberal with its flowers.

General McArthur. Crimson-scarlet buds and blooms, usually well-shaped and very fragrant. The plant is erect, flowering freely in successive crops, with good foliage easily protected from disease.

Killarney Pink. Long-pointed buds, opening to flat, bright sparkling pink blooms with enormous petals. Vigorous grower and very free blooming.

Killarney White. A pure white sport of the original Killarney, identical in shape of bud, petalage and blooming qualities.

Lady Ashtown. Satiny buds and blooms of deep shining pink, with a yellow glow at base of petals; high center, double and quite fragrant. Plant is strong, free blooming and hardy, but needs protection against disease.

Los Angeles. Very lovely buds and exquisite flowers of salmon-pink, with yellow shading, and very sweetly perfumed. In favored locations the plant is of excellent habit, with good foliage and blooms well, but it is not uniformly successful.

Mme. Caroline Testout. Large, globular flowers of satiny rose, shaded lighter toward the outer edge of its enormous petals; fairly fragrant. Plant strong, and a persistent bloomer, but foliage requires usual protection.

Mme. Butterfly. Fine, light pink buds and flowers, tinted with gold near base of petals, of exquisite shape and richly perfumed. Plant is strong, throwing up big branching sprays of bloom.

Premier. Rich, dark pink flowers of full form, fine size, and pleasing fragrance, borne singly on stiff, almost thornless stems by a vigorous and robust plant with very fine disease-resistant foliage.

Richmond. Crimson-scarlet buds and flowers of good size and form, bearing the real Damask perfume. Plant is moderately strong and very free flowering throughout the season.

Sunburst. Fine yellow flowers, strongly suffused with orange at the center, fragrant, and well-shaped. Plant spreading. Very beautiful but it takes time to establish and grow it well.

Étoile de France. Vivid crimson flowers, with full, rounded centers of bright cerise; fragrant and long lasting. Strong, free blooming plants with stiff stems and good foliage.

Gruss an Toplitz. Small to medium-sized double blooms of brilliant crimson with velvet shadings and intense fragrance. Blooms in open clusters with the utmost freedom throughout the whole season. Bush extremely vigorous and hardy.

Kaiserin Augusta Victoria. Well-formed, creamy buds which develop slowly to blooms of absolutely perfect form, snowy white with a slight tint of lemon at center; fragrant. Plant moderately vigorous, free-blooming, and hardy.

Lady Hillingdon. Slender, pointed buds and elegantly cupped flowers of deep saffron-yellow, paling toward the edges and becoming lighter as they expand; fragrant. The plant is erect, with perfect foliage, but rather tender.

La France. Bright pink flowers with curled petals showing silvery tints; intensely fragrant. Plant strong and reasonably healthy.
Mrs. Aaron Ward. Delightful little buds of golden buff, opening to fully double, attractive shaped flowers of tawny golden pink, with an agreeable fragrance. The plant is dwarf, spreading, with very healthy, holly-like foliage, and always in bloom.

Maman Cochet. Carmine-pink, double blooms of fine form and substance, creamy buff at the center. Spreading, wiry growth; free blooming and very hardy for a Tea Rose.

Maman Cochet, White. A white form of Maman Cochet, but often flushed with pink on the outer petals. Foliage equally good and the plant just as hardy and free blooming.

Queen of Fragrance. Shell-pink, double blooms tipped with silver, elegantly shaped and noted for fragrance.

Radiance. Brilliant rose-pink buds, opening to well-formed shining flowers with lighter tints on the reverse of the petals; globular in shape and very fragrant. The plant makes splendid growth, has wonderful blooming qualities.

Red Radiance. An even better rose than its parent, Radiance, in habit, bearing big globular flowers of deep rose-red on strong, individual canes which are freely produced all summer until frost. Foliage excellent.

HYBRID PERPETUAL ROSES

Two Year Field Grown, Nice Hardy Plants

These Roses are very hardy, extremely vigorous sorts, growing 3 to 10 feet high, dependable in almost all parts of the United States except the extreme South. They are not, as their name implies, perpetually in flower, but produce, in their one great burst of bloom, a lavish display of flowers which cannot be surpassed by any continuously blooming sorts. Their flowers are larger, fuller and generally much more fragrant than any of the modern Roses.

80c each; $3.40 per dozen.

Captain Christy. Delicate flesh-pink, deepening in color toward the center, medium size, double, well-shaped, and fragrant. Robust, dwarf growth and blooms freely in Autumn.

Frau Karl Druschki. Pinkish buds and magnificent, snow-white blooms with deep, firm petals, forming a flower of unimpeachable shape, but without fragrance. Plant one of the strongest, grows 4 to 10 feet high; foliage normal; blooms freely and continuously.

Hugh Dickson. Brilliant scarlet-crimson blooms, large, full, and fragrant. Extremely vigorous growth and established plants bloom throughout the season.

Mme. Gabriel Luizet. Rather large pink blooms, with mauve shadings, double, and slightly fragrant. Vigorous, healthy, and profusely blooming at its season.

Paul Neyron. Dark lilac-rose, blooms of immense size, fair form, very double, and remarkably fragrant. Quite vigorous, strong, almost smooth canes with tough, leathery foliage; particularly free and constant bloom.

Earl of Dufferin. Pure, velvety-crimson, shaded with chestnut-red; fine globular flowers, held erect, and richly perfumed. A strong, vigorous grower, blooming over a long season.
General Jacqueminot. Scarlet-crimson, buds and clear red flowers of moderate size and excellent shape; deeply fragrant. Plant strong and bushy, 3 to 6 feet high; normal foliage, and sometimes blooms a second time.

J. B. Clark. Very large, light red blooms, shaded blackish maroon, globular, very double, slightly fragrant. Growth enormous (6 to 12 feet); average foliage; early bloom profuse but scarlet later.

Margaret Dickson. White with pale-rosy center, well shaped, and faintly fragrant. Plant large; foliage good.

Ulrich Brunner. Large, fairly full flowers of bright carmine-red, cupped form, and very fragrant. Strong, erect, smooth wooded bush, with large foliage. Blooms profusely in early summer.

American Beauty. Dark pink, shaded with smoky carmine, full, globular form, and most deliciously fragrant. Growth quite vigorous; blooms with unusual freedom over a long season. Foliage not very good.

SPECIAL OFFER No. 150: Five Roses HYBRID PERPETUALS
Our Selection, for $3.00

CLIMBING HYBRID TEA or EVERBLOOMING ROSES

Two Year Field Grown Plants

While not as a rule as free flowering as the bush type of Hybrid Tea Roses, these Climbing forms produce a large crop of beautiful flowers in June, with a liberal scattering of blooms throughout the season.

Climbing Caroline Testout. Combines all the good points of the popular pink bush rose in climbing form.
80c each, $8.40 per dozen.

Climbing Kaiserin Augusta Victoria. Very free flowering climbing form of this most popular white rose.
80c each, $8.40 per dozen.

Climbing Los Angeles. A counterpart of that most popular bedding Rose, Los Angeles, but of strong climbing habit.
$1.50 each, $16.80 per dozen.

Climbing Lady Ashtown. The best of all the climbing Hybrid-Tea varieties. A plant in the most exposed part of our nursery, with very little protection, has withstood the past several winters, producing not only an immense crop of its very large soft rose-colored flowers in June, but continuing to bloom almost without intermission until the end of the season.
80c each, $8.40 per dozen.

THE PROPER PLANTING SEASON
is during the months of February, March and April in the spring, and late October, November and December in Autumn.
Nursery stock is successfully planted any time during winter months that ground is not hard frozen. In freezing weather the roots should be well protected in handling and not exposed to frost, however.
HARDY CLIMBING ROSES

Two Year Field Grown

Climbing Roses add a charm and beauty to many objects; when clambering over the porch, covering a trellis or entrance gate, or when trained along the fence or hiding an old stump. They change ugliness to beauty, and where beauty is they emphasize it. The varieties we offer are hardy and lasting.

70c each; $7.20 per dozen.

Climbing American Beauty. Not quite the same as its namesake, but descended from it and a far finer rose; bright pink, nearly red, large and double, and one of the few hardy climbing roses with bloom equal to those of the bush rose.

Bess Lovett. Large, fairly full flowers of light - crimson - red, cupped - shaped, and borne in long stem clusters suitable for cutting; sweetly fragrant. Plant very strong, exceedingly free flowering, with fine, glossy foliage almost immune to diseases.

Dr. W. Van Fleet. Pale pink buds and flowers equal in form and size to the finest Hybrid-Teas, borne on long individual stems. The plant makes enormous thorny canes and produces thousands of flowers. Perfect foliage.

Gardenia. Yellow buds and creamy flowers with rich yellow centers, moderately large, well formed, and borne in small sprays. Plant is extremely vigorous, hardy in all but the severest climates.

Tausendschön, Thousand Beauties. Large flowers, charmingly ruffled, varying from the bud to the open flower through many shades of faint yellow, creamy white and bright rose-pink; slightly fragrant; enormous trusses. Plant strong, up to 15 feet high. Thornless; hardy and healthy.

American Pillar. Fairly large, single flowers of brilliant crimson-pink, with large white centers and golden yellow stamens. Blooms profusely in tremendous clusters on plants of astonishing vigor.

Crimson Rambler. Small, ruffled flowers of dazzling, scarlet-red, borne in giant sprays on a rampant husky plant with coarse foliage.

Dorothy Perkins. Identical with the Pink Dorothy Perkins, but pure white.

Paul’s Scarlet Climber. Intense scarlet flowers of excellent shape and moderate size, borne in small trusses. Plant of moderate growth; foliage good; bloom very liberal at its season.

**Baldwin.** Large, roundish, skin deep red; flesh juicy, crisp, sub-acid, good flavor; very vigorous and productive. The best all around winter apple for Northern States. December to March.

**Delicious.** Fruit large, nearly covered with brilliant dark red, flesh fine grained, crisp and melting, juicy with a delightful aroma; of very highest quality. A splendid keeper and shipper. Tree one of the hardest. Winter apple.

**Duchess.** Large streaked with red and yellow, juicy, sub-acid. Tree a young and abundant bearer. (Summer.)

**Grimes Golden.** Very large, skin golden yellow; flesh tender and crisp. A very good fall apple. September to January. Grown in all sections of the country.

**Kyslop Crab.** Large, handsome, crimson, splashed with dark red. Very prolific. September.

**Jonathan.** Perfectly hardy and is productive in all soils. Fruit of medium size, very regularly formed. Skin thin and smooth; yellow ground almost covered with lively red stripes deepening to dark red in the sun. A splendid market variety of dessert quality. (Winter.)

**King David.** A fine apple, of largest size and best quality; red, showy. November to January.

**Liveland Raspberry.** Ripens with Transparent. Skin same color with stripes of pinkish red. (Early.)

**McIntosh.** Large, dark red. A handsome apple of fine quality. Tree vigorous and hardy. (Autumn.)

**Maiden’s Blush.** Smooth, round, beautifully flushed with red on creamy yellow ground; flesh tender, of pleasant but not high flavor. (Autumn.)

**Mammoth Black Twig.** Very closely resembles Paragon, but there is a difference. Many Nurserymen list same as Paragon. It is generally known by those who have watched them very closely that the Paragon is the best one of the two. They are both good varieties to plant commercially or for home use. (Winter.)

**Northern Spy.** Large, striped red, juicy, rich. Tree a rapid grower and good bearer. (Winter.)

**Paragon.** A round apple, of extra large size; skin smooth, yellowish, covered with deep red, the general effect being dark red; flesh tender, tinged with yellow, crisp, sub-acid, aromatic, of excellent quality in every way. Tree is vigorous and healthy and yields big crops every year. (Winter.)

**Red Astrachan.** Large, nearly covered with deep crimson, juicy, rich, acid, beautiful. Tree a vigorous grower. A good bearer. (August.)

**Red Siberian Crab.** Almost an inch in diameter, grows in clusters. Yellow with lively scarlet check.

**Rome Beauty.** Large, yellow, bright red, handsome, first quality, moderate grower, early bearer. (Winter.)
PEARS

First class pears are always in good market demand, and they are today one of the most promising fruits to plant for profit. Especially should every garden have a few pear trees.

Bartlett. It is the most popular pear, both for home use and market. Is a buttery and melting sort, with a rich flavor. The tree is vigorous in growth. Season September.

Clapp's Favorite. A superb, large, yellow pear, richly blushed with russet-red next to the sun; juicy and delightful. The first market value pear to ripen, and growers report that on account of its earliness it often makes them more money than any other. August.

Duchess. Strong grower, productive, not subject to blight. Fruit large, light green patched with russet, melting, juicy, sweet and good. October and November.

Kieffer. One of the most prolific pears. It is an abundant and regular bearer. Good shipper. Fruit large, color yellow with red cheek. Will produce ten bushels of pears to a tree. October.

Seckel. Medium size, skin rich, yellowish brown, with deep brownish red cheek when fully ripe; flesh very fine grained, sweet, exceedingly juicy, melting, buttery. One of the richest and highest flavored pears known. Summer.
PLUMS
Each. 10. 100. 1,000.
3 to 4 feet....$ .70 $6.00 $50.00 $400.00
4 to 5 feet..... .90 8.00 60.00 500.00
5 to 6 feet.... 1.00 9.00 80.00 700.00

Abundance. This is one of the best in quality, a liberal bearer of good sized fruit. The flesh is yellow and juicy; the skin a dark red where exposed to sun.

Burbank. Ripens a little later than Abundance, is a stronger grower and sets enormous loads of fruit, which usually need to be severely thinned. Flesh is yellow and a trifle firmer than Abundance.

Red June. This variety usually ripens a week before Abundance. Fruit is of good size: flesh is yellow and firm, skin a mottled garnet overlaid with bloom. The trees are vigorous and productive.

Satsuma. This variety ripens later than the other varieties on our list, and is one of the best, if not the very best, for canning or preserving. The flesh is deep red and of very good quality; the pit is very small, no larger than a cherry pit.

Shropshire Damson. Medium size fruit, produced in thick cluster or groups. Tree a strong grower, and very productive of dark purple plums. October.

MONTMORENCY CHERRIES.

5 PER CENT DISCOUNT
On Cash Orders Received
Before March 15th

Governor Wood Cherries.

Cherry Trees

An acre of cherries (110 trees) five years old should produce $300.00 in fruit. At ten years $1,800.00 and regularly thereafter. It pays to raise cherries.

Sweet Cherries

Black Tartarian. Very large, bright, purplish black; half tender, juicy, very rich, excellent. Vigorous and productive. Last of June or first of July. A general favorite.

Governor Wood. Very large, rich light yellow, with red cheeks, juicy, sweet, one of the best. Late June.

Napoleon Biggareau. Very large, pale yellow or red, very firm, juicy and sweet; vigorous and very productive. One of the best. Early July.

Schmidt’s Biggareau. Fruit of immense size, rich, deep black; flesh dark, tender very juicy with fine flavor; bears abundantly.

Sour Cherries

Early Richmond. This is a hardy cherry, fruiting on young trees soon after planting, and bearing every year enormous loads of dark red fruit that does not rot upon the trees; can be left without picking longer than most varieties. Unsurpassed for canning and profitable for market. Ripens through June.

English Morello. Medium to large, blackish red, rich acid, juicy, good; very productive. Late.

May Duke. Large, red; juicy and rich; an old, excellent variety; vigorous, productive. June.

Montmorency. The most popular of all hardy cherries for market and home use. This cherry is planted largely. The fruit is in great demand. It is of large size, light red in color; stem rather short. The trees bear fruit soon after planting. Late.

Yellow Spanish. A most beautiful and popular light-colored cherry. Large; pale yellow, with red cheek when exposed to the sun; flesh firm, juicy and delicious. June.
We can grow here in our soil and climate extra fine peach trees, having strong fibrous roots; the tops have nice clean yellowish brown bark with bright red twigs, indicating sturdy vigorous constitution.

Each. 10. 100. 1,000.

5 to 6 feet.... 50 400 300.00

Blyeau. Large; nearly covered with dark red; flesh white, rich, juicy and firm. A good shipper; rather late. Middle to last of October.

Belle of Georgia. This is a standard commercial variety planted by nearly every grower. In fact, it is necessary to complete succession. Ripens with Old Mixon, but because of its being a better yielder has largely superseded that variety. Tree is hardy in bud and early and reliable bearer of fruit of large size and fair quality; flesh is white and very free. Skin white with red cheeks.

Carman. This is a hardy and reliable bearer of medium to large white fruit having beautiful red cheek where exposed to the sun. This is a standard commercial variety and should be included in every complete list. The best early market peach.

Champion. The flavor of this variety is delicious, especially when canned. Fruit is large, skin creamy white with red cheeks where exposed to the sun. This variety is planted by most commercial growers. July 20th.

Crawford's Early. It is a magnificent, yellow fleshed fruit, of large size and highly colored. Not being planted by commercial growers as much as formerly. Tree a moderate grower and extremely productive. One of the earliest.

Crawford's Late. Ripens with Chair's Choice. Freestone, high quality and very large size; flesh deep yellow; skin yellow with a broad dark red cheek. Ripens about 6 days after Elberta.

Elberta. This is one of the most prolific and best selling peach of the whole list; from 20 to 50 per cent of every commercial orchard should be of this variety. An exceedingly large, light-colored yellow peach, with red cheek, flesh yellow, a perfect freestone. Middle of August.

Fox Seedling. Medium to large, white flesh, skin creamy white, with bright red cheek; a very heavy bearer. About September 15th.

Greensboro. Large in size; white in color with a red cheek. Flesh rich and melting; very juicy; tree a strong grower. June 25th to July 10th.

Hily. This is one of the most beautiful peaches on the list and the earliest perfect freestone; a white fleshed peach of fair quality; skin creamy white, nearly covered with red. Fifteen days ahead of Elberta.

Iron Mountain. Size large, shape oblong or egg shape, color pure white, sometimes having a slight blush. September 20th to October 10th.

J. H. Hale. One of the best sorts for market or garden. Fruit is very large, round, quality excellent, skin yellow finely colored, flesh yellow, sweet and melting. Ripens just before the Elberta. One of the best commercial sorts.

Krummel. Freestone. Season of ripening in Delaware about September 10th to 20th. Fruit is quite large, fine flavor, skin yellow, splashed with red. Fine for canning or preserving, largely planted by the Commercial Growers as with the garden planters.

White Heath Cling. Ripens from September 10th to 15th. This is an old variety of cling peaches and has never been excelled by any other of its kind. Fruit extra large and roundish; flesh white and exceedingly juicy. It is a favorite with all housewives for canning purposes.
APRICOT TREES
2 yr. 4 to 5 feet—$1.00 each,$9.00 per 10.

To those who contemplate planting Fruit Tree in a commercial way: We invite correspondence that we may be able to advise you the varieties best suited for your immediate vicinity.

QUINCE TREES
2 yr. 4 to 5 feet—$1.00 each, $9.00 per 10.

Champion. Fruit very large, fair and showy; cooks as tender as an apple, and without hard spots or cores; flavor delicate, imparting an exquisite taste and odor to any fruit with which it is cooked. Tree handsome, surpassing other varieties in this respect; bears abundantly while young. Later than Orange.

Orange. Large, roundish; bright golden yellow; cooks tender; quality excellent; valuable for preserves or flavoring. Very productive; the most popular and extensively cultivated of the old varieties.

Bourgeat. Large, golden yellow; fine quality; tree healthy; a good one.

STANDARD APPLE COLLECTION No. 20
10 Standard and Best Varieties, 5 to 6 feet, for $5.00

GRAPES

The incorporation of the Eighteenth Amendment into the Constitution of the United States has created a tremendous demand for Grapes. In fact, grapes sell for about five times the price they used to bring. They should produce a gross revenue of from five to six hundred dollars and upwards per acre.

![Concord Grapes]

**Agawam.** Fruit purplish red, large, rich and sweet; keeps well; vine vigorous but subject to mildew; ripens soon after Concord.

**Caco.** A new variety which is proving to be one of the best. It is wine-red, with abundant bloom; the berries are very large; bunches medium in size, compact and of good form. Ripens almost with Concord. Possibly a few days earlier, but so rich in sugar it is excellent in flavor two weeks before fully ripe.

**Concord.** Decidedly the best and most popular grape in America, and deservedly so. Adapts itself to varying conditions and is grown with more or less profit in every grape-growing state in the Union. Bunch large, shouldered, compact; berries large, covered with a rich bloom; skin tender, but sufficiently firm to carry well to distant markets; flesh juicy, sweet, pulpy, tender. Vine a strong grower, very hardy, healthy and productive. For general cultivation, the most reliable and profitable variety.

GOOSEBERRIES and CURRANTS

Owing to restrictions the Government will not permit shipment of Gooseberries and Currants into many states, and for this reason we are not listing them. Should you be interested, ask if we can ship into your section, state the number and variety you are interested in, and we will be glad to quote you by letter.

BLACKBERRIES

In planting your Blackberry patch, select land that is full of humus and retains moisture well, for this crop ripens at a time when we can naturally expect dry weather, and if your patch is on land that quickly dries out the crop will suffer. Culture for Blackberries is the same as Raspberries, only they need more room and should be set three to four feet apart in the row, and the rows from seven to eight feet apart.

El Dorado. The vines are very vigorous and hardy, enduring the winters without injury, and their yield is large. Berries are very large, jet black, borne in large clusters, and ripen well together; are very sweet, melting, pleasing to the taste, and have no hard core; quality unsurpassed; mid-season.

Merseeau. Iron-clad in hardiness; has a combination of the desirable qualities of a good Blackberry: exceptionally sweet, rich and melting nearly without core. Canes very strong; upright grower, attaining a height of seven to eight feet. The yield is simply enormous, and affords heavy picking from the first until all the crop is mature. Season late.

Early Harvest. More compact in growth than most other varieties and therefore suitable for small gardens. It is very productive, ripens early, and the fruit is of excellent quality.

Lucretia Dewberry. The best of the Blackberry family and decidedly the most productive. The berries are far larger and incomparably better than any blackberry, and of unequalled mellowness, sweet and luscious throughout. Should be covered like strawberries in Winter in the North. Dewberries are the same as blackberries except the canes run on the ground, whereas the Blackberry canes stand upright.
RASPBERRIES

Any ground capable of raising good general crops is suitable for Raspberries, or they may be grown at a profit in young orchards. Red Raspberries, for field culture, should be planted in rows seven feet apart and two feet apart in the rows; for garden culture four by five feet. The canes should be cut back within two inches of the ground immediately after planting. In pruning the bearing canes, cut back, on an average, half their length. Old canes should be cut out after the freeze of winter. There is seldom enough Red Raspberries grown to supply the market demands. With good culture, the average yield is seventy-five bushels per acre.

Plum Farmer. The largest of all black raspberries; quality of the fruit unsurpassed. Good for both home and market.

Cumberland. The canes of this variety are strong and vigorous, quite in accord with such a large-fruited and abundant bearer, and they are hardy. The berries are very large, jet black, firm and of excellent quality. They begin to ripen with Plum Farmer, but extend over a longer season, taking about two weeks to ripen.

Cuthbert. The best red raspberry. Heavy yellder of large solid fruit. Canes of strong growth. Berries of large size. Ripens in mid-season until late and succeeds everywhere, even in the South.

St. Regis. (Everbearing.) Ripens with the earliest and continues on young canes until autumn. Color red, flesh firm and meaty. As a commercial proposition the best results are obtained by cutting off the old canes in the spring and forcing a vigorous growth of new ones, which will ripen fruit after the regular raspberry season.

SEND US NAMES OF POSSIBLE CUSTOMERS with your order and we will give you FREE a nice reward.
NUT TREES

**Butternut.** A walnut, producing oily, nutritious kernels for which it is much prized.
6 to 8 feet—$3.00 each, $27.50 per 10.
**Black Walnut.** Our native walnut; does well on any well-drained soil. The wood of the black walnut commands the highest price on the market. Plant walnuts now.
6 to 8 feet—$3.00 each, $27.50 per 10.
**English Walnut.** This valuable tree requires well-drained soil. The trees that we offer are all grown from large French nuts, and are thin shelled; of excellent quality.
4 to 5 feet—$3.00 each, $27.50 per 10.

**Japan Walnut.** Bears nuts of medium size in clusters; very rich flavor.
4 to 5 feet—$3.00 each, $27.50 per 10.

**Pecans.** The demand for these nuts increases from year to year, as they reach wider markets and become better known as the richest flavored of all nuts. The large paper-shell pecans retail for from 80c to $1.00 per pound. The tree is very long-lived, healthy and increases in value with age; it never outgrows its bearing capacity as with nearly all fruit trees. Prefers a rather moist soil.
7 to 8 feet—$4.00 each, $37.50 per 10.

ASPARAGUS

Asparagus usually sells at a good price and being ready for market in May and June, the income derived from it is especially appreciated at that time of the year. It is usually planted on light soil to have it early; though it can be easily grown on all good garden soils. The sprouts are not usually cut until the second or third year after planting, except to mow down the canes in the fall. The roots will give food crops from fifteen to twenty years. Plant the roots in the spring from four to six inches deep, covering with only three inches of soil at first and cover the remainder as the plants grow. The rows should be five feet apart, with the plants set two feet apart in the row. Broadcast five bushels of salt and 300 pounds of Nitrate of Soda to the acre in March, and give it a good top dressing of stable manure in November. It is successfully planted during March, April and May, also during the fall months.

DEL-MAR-VA NURSERIES, INC.
STRAWBERRY PLANTS

We are located in the "Heart of the Del-Mar-Va Peninsula," which is the center of the strawberry market of the world. Growing strawberry plants is one of our specialties, and we know how to pack and ship, that they will reach you in first-class condition.

It is not an unusual thing for an acre set to strawberries to pay back a net income of $500.00 per acre. They are the main fruit crop here on the Peninsula.

Growing strawberry plants is one of our specialties, and we know how to pack and ship, that they will reach you in first-class condition.

The land should be plowed deep as possible, as this gives the water a chance to go down quick when it is wet and cause it to rise when dry. Lay off the rows after you have thoroughly pulverized or made smooth by some kind of machinery, either 3½ or 4 feet apart. Set the plants one to one and a half feet apart in the row. Spring is the proper time to set strawberry plants; however, they can be set with reasonable success in the fall.

When setting plants set so that the roots are not allowed to become dry.

### Everbearing Varieties

**Progressive.** A genuine fall bearing. This is, without a doubt, the best one: plants of good size, deep-rooted. Makes as many plants as most of the standard varieties. To obtain best results keep blooms off until August 1st, then when they begin to ripen you will have something to be proud of.

$8.00 per thousand.

**Kellog's Premier.** Noted for its long fruiting season. Ripens with the early varieties and continues until the late varieties come on. Adapted to all sections of the country. Fruit is large to very large and holds size well through ripening season. It is known by many as the frost-proof strawberry. A money-maker for the growers here on the Peninsula.

$5.00 per thousand.
Late Varieties

Lupton Late. In many respects it is like Gandy, but far more prolific and comes into bearing a few days ahead. Its double dark green cap sets the fruit off wonderfully which causes an immediate lastingly demand for them when placed on the market. Shipping qualities unsurpassed by any other variety. Plants strong and healthy growers.
$8.00 per thousand.

Big Joe (Joe Johnson.) The berries are very large, having a bright green cap, which makes them very attractive. Ripens about three days before Gandy. Will thrive in any soils that will produce other varieties. We consider this one of the best money-makers and rivals Chesapeake.
$6.00 per thousand.

Chesapeake. Ripens a little earlier than Gandy. Has a beautiful appearance, extra large, even in shape and uniform in size. Plants are healthy dark green in color. It has no weakness of any kind and is planted largely for market purposes here on the Peninsula.
$8.00 per thousand.

Gandy. This variety is grown here on the “Del-Mar-Va Peninsula” in thousands of acres which always produce more money on an average than does any other variety. Does best in springy land with some clay in its make-up. Have large bright green caps which makes the berries very beautiful and attractive.
$5.00 per thousand.

Mid-Season Varieties

Senator Dunlap. A reliable market berry and one that succeeds in all parts of the country. It comes in among the earliest to ripen and is very productive. The fruit is a good shipper to all points of the country, hence makes it one of the best early sorts.
$5.00 per thousand.

William Belt. Of all the many varieties of the mid-season sorts that is grown, William Belt undoubtedly is the most popular. The plant is vigorous, though not a rampant grower, succeeds upon almost all soils, invariably yields very heavily. Flesh is solid and deep crimson in color, while the blossoms are large with abundance of pollen.
$6.00 per thousand.
The dictionary says "Perennial" means "Perpetual," and that is what these are. When you plant them, they are there permanently. They die down to the ground at the approach of winter, but come up again each spring, always better and larger than before. Some plants in this class brighten every month from early spring until hard frost, with brilliant color. They require no trimming nor attention. Give them fair soil, keep them reasonably free of weeds, and they return their thanks with yearly smiles. They cost little; they last indefinitely; and their bright and showy colors add a lot of beauty to the garden and especially during those months when few other plants are in bloom.

**Delphinium, Larkspur.** Dark-blue. 3-4 ft. June and July. 25c each; $2.00 per 10.

**Digitalis, Foxglove.** 3-4 ft. White and pink. One of the finest Perennials. 25c each; $2.00 per 10.

**Daisy, Shasta.** White. June and July. 2 ft. Fine for cutting. 25c each; $2.00 per 10.

**Gaillardia, Blanket Flower.** 2 ft. Crimson and yellow. June until frost. 25c each; $2.00 per 10.

**Gysophila, Baby's Breath.** 2 to 3 ft. White. July and August. 25c each; $2.00 per 10.

**Hardy Pinks, Dianthus.** Assorted colors. 18 inches. Mid-summer till frost. A very good one for cut flowers. 25c each; $2.00 per 10.

**Hardy Phlox.**
TUBEROUS-ROOTED BULBS

CANNAS

Good strong divisions: 15c each; $1.00 per 10; $8.00 per 100.

President. Magnificent red. Flowers immense size of extra good quality.

King Humbert. The best Canna introduced. Large heart-shaped leaves, brown over bronze. Flower velvety orange-scarlet, flecked carmine; rose tinted at margin and base.

DAHLIAS

Dahlias, too, have been wonderfully improved by crossing. They are among the finest late blooming plants in the garden. They show a wide range of color in various forms and a mixed bed will display a wealth of beauty in the late summer and early fall. We do not list ours under named varieties, but our Dahlias include many of the handsomest types.

Price: Each 25c; $2.00 per 10.

State whether you desire Pom-pom, Show, Cactus, Decorative or Peony Decorative. Also give colors wanted.

GLADIOLUS

Price: 10c each; 70c per 10; $6.00 per 100; $50.00 per 1,000.

America. A beautiful soft shell-pink color, tinged lavender; growth and habit perfect. Too well known to need comment. Fine for cut flowers.

Chicago White. Pure white, with lavender markings in the throat. Early blooming; fine for florists. Several flowers open at one time.

Peace. Immense pure white flowers with a touch of carmine in the lower petals, beautiful and exceedingly fine.

Niagara. Delicate creamy yellow, lightly marked and splashed with rosy-carmine in the throat.

Panama. A new derivation from America, which is more deeply pink and a trifle larger than its parent.

Crackerjack. Dark red, throat spotted with yellow and maroon.

Mrs. Frances King. Large flowers of a light scarlet color or better described as flame color.

Gladiola Mixture Offer No. 55

This assortment contains 18 varieties, our selection, which makes a beautiful array of colors.

18 Bulbs for $1.00.
Armour’s Lawn and Garden Grower

In order to meet the needs of Trees and Shrubs, Flowers and Small Vegetables, and for improving old lawns as well as in the planting of new ones, we have found a mixture of a properly balanced concentrated plant food blended from those chemical fertilizer ingredients best suited for the growing of grass and gardens. It is free from objectionable odors and weed seeds and is easily applied. It has at least 16 times as much plant food as ordinary farm manure. The continued use of this fertilizer will materially aid in eradicating weeds from your lawn.

This Lawn and Garden Grower is put up in white cotton paper lined bags with full directions for use printed plainly on every bag.
